Grupo de investigación  
Física de la Atmósfera  
(RNM119)

## Alejandro Ontiveros Valero

I am from Granada and I am currently hired by the Investigo Program. Graduated in Physics in 2022, I already studied Atmospheric Physics and did a TFG oriented to represent maps of atmospheric variables. Currently I work with in situ instrumentation in maintenance tasks and, mainly, programming in Python to obtain, clean and represent data.
